

IN THE SPECIFICATION

In response to the Examiner's verbal request, enclosed is a "courtesy copy" of the specification with room at the top for punch-holes. The "courtesy copy" of the specification is *not* a substitute specification, because 37 CFR 1.125 does not permit a substitute specification in a reissue application. Nevertheless, the "courtesy copy" of the specification is submitted in response to a request by the Examiner to leave room at the top for punch-holes.

In accordance with 37 CFR 1.173, the "courtesy copy" of the specification includes the entire specification of the patent (minus claims¹), with the matter to be omitted by reissue enclosed in square brackets, and any additions made by reissue underlined. The amendment of the specification corrects a sequence listing error occurring in Table I:

deleting "Mouse c-abl (SEQ ID NO:30) K-K-K-K-K"

and substituting --Mouse c-abl (SEQ ID NO:30) S-A-L-I-K-K-K-K-M-A-P--

What follows is a chain of error in the sequence listing. Table 1 lists a representative sample of nuclear localization signals and expressly incorporates by reference Garcia-Bustos et al., Biochem. Biophys. Acta 1071: 83 (1991) (attached) as authority. See col. 5, first line following Table 1. The Garcia-Bustos et al. citation indicates at its Table 1 that the nuclear localization signal for mouse c-abl is K-K-K-K-K. However, this sequence is inaccurate as evidenced by VanEtten et al., Cell 58: 669 (1989) (attached) to which the Garcia-Bustos et al. secondary reference refers as the primary reference. The VanEtten et al. primary reference indicates at its Table 1 that the nuclear location signal for mouse c-abl is S-A-L-I-K-K-K-K-M-A-P. The sequence listing is thus in error. Applicant has consequently introduced the present amendment in the specification to correct the sequence listing error. I hereby state that the "courtesy copy" of the specification does not include new matter.

¹ In accordance with 37 CFR 1.173, the claims appear with the matter to be omitted by reissue enclosed in square brackets, and any additions made by reissue underlined, which claims (pending, amended, and new) are presented above.
